PROFESSIONAL EXPERIENCE

UzAuto Chevrolet | *Software Development Intern*

June 2022 - December 2022

- Identified and fixed bugs in existing software systems of licence plate identification.
- Participated in designing new modules for internal automation tools.
- Tested and deployed software updates across multiple environments.
- Worked with CRM and ERP system Odoo.

McDonald's | *Crew Trainer*

April 2023 - December 2025

Worked part-time while completing studies, gaining experience in fast-paced customer service and teamwork environments.

IBM Ireland | *Software Development Intern*

January 2026 - September 2026

Worked on the ASR (Automatic Speech Recognition) pipeline for IBM Watson's speech-to-text engine.

- Built and validated a large-scale training pipeline for Portuguese (pt-BR) model that was deployed in prod
- Tuned LSM parameters across multiple language models, had real business impact on improving prod models
- Worked with different audio formats and sampling rates, including 8 kHz and 16 kHz speech data.
- Integrated and evaluated Voice Activity Detection (VAD) using Silero VAD as part of the speech processing pipeline.
- Ran WER (Word Error Rate) benchmarking and regression testing via Jenkins, and corrected arithmetic errors in previously reported WER figures

EDUCATION

TUD Software Development (4ht year)

Expected graduation: June 2027

ALL DETAILED GRADES AND REFERENCES ARE ON REQUEST

PROJECTS

Developmental AI Agent

(https://github.com/Muha126/AI_Baby/tree/main)

Python, Machine Learning, Reinforcement Learning

- Developing an autonomous AI agent inspired by early human learning and cognitive development.
- Implementing reinforcement learning with intrinsic drives such as curiosity, hunger and discomfort instead of predefined behaviors.
- Designing memory and continual-learning mechanisms to retain previously acquired knowledge and skills.
- Training the agent in simulated environments to learn object interaction and exploration, including LLM in a role of mother.

Cinema Ticketing Booking

Django, React, SQLite, REST API

(https://github.com/Muha126/Cinema_Ticketing_System)

- Developed a full-stack web application within a team for browsing, selecting, and booking cinema tickets.
- Integrated user authentication (registration and login), movie/showing browsing, seat reservation, and ticket booking functionality.
- Implemented an admin panel for cinema staff to manage movie listings and showing schedules, with system admin oversight of the database.

SKILLS

Tech literacy: OOP, Python, C#, PHP, SQL, HTML5, CSS3, Git, Linux/Bash, Machine Learning
